

## Sign Us Up for a FREE Water Quality Presentation!!!

To schedule a Lake\*A\*Syst group presentation, simply fill out the front and back of this form and send it to the address printed on the back. Please answer a few simple questions and pick the topics you and your lakeside neighbors are most concerned about and I will contact you to confirm as soon as possible. Don't forget to pick a few alternate dates, just in case one is already booked. A estimate of how many people may attend is helpful and flexible. **There is NO obligation and your name and organization members are kept completely CONFIDENTIAL.** This program is **NON-REGULATORY** and is merely designed to be educational. We do not endorse or advertise for any specific product or company. What you do with the information provided is up to you!

The Michigan Groundwater Stewardship Program is designed to help residents and farmers identify ways to reduce the risk of groundwater contamination associated with the application of pesticides and nitrogen fertilizers. Programs are both voluntary and confidential and aim to maintain a focus on the financial and technical constraints that drive everyday decisions. *MGSP is a cooperative effort between Michigan Department of Agriculture, Michigan State University Extension, USDA Natural Resources Conservation Service and Michigan's AmeriCorps.*
